

Guide Dogs.

Online course

Learn how to assist people with low vision or blindness.

Research conducted with people with low vision or blindness revealed that 82 percent of respondents experience issues accessing cafes and restaurants, with the main challenges being difficulty navigating around the venue and the staff's lack of knowledge about people with low vision or blindness.

However, you can help us make a change by learning to assist and guide a person with low vision or blindness!

In our interactive, self-paced online module, 'Assisting people with blindness or low vision,' you will learn how to:

- appropriately offer assistance to a person with low vision or blindness;
- guide a person with low vision or blindness to their destination;
- describe how to guide a person down stairs, through a narrow space or to a seat; and
- describe a space to a person with low vision or blindness.

Use the code "Sydney" at checkout to receive free access to the module.

What have users said about our courses?

“

Thanks for an excellent course. I found it extremely useful, especially the practical activities.

- James

“

I am really impressed with the quality of this course. It went above and beyond my expectations. It was structured really well and flowed beautifully through all the different topics.

- Lauren
